

Guilherme Ferreira

Full Stack Software Engineer

Itajubá, MG, Brazil +55 35 98869-5696 guilhermesin2011@gmail.com linkedin.com/in/guilheeeeeerme github.com/Guilheeeeeerme

SUMMARY

Full Stack Software Engineer with 10+ years of experience building distributed systems, enterprise applications, and manufacturing software. Strong expertise in the JavaScript and TypeScript ecosystems, with a focus on Domain-Driven Design, event-driven architectures, and enterprise integrations. Two years of hands-on AI-assisted development using Claude, Cursor, and OpenCode for spec-driven delivery, PRD-based feature design, parallel worktree development, subagent orchestration, and AI-powered PR review. Experienced in designing and evolving software for manufacturing, financial services, and real-time systems. Fluent in English and experienced collaborating with distributed international teams.

EXPERIENCE

MachineMetrics — Full Stack Software Engineer

Apr 2024 – Present

- Develop enterprise manufacturing software used by CNC operators and production teams across shop-floor workflows.
- Designed and implemented MES capabilities supporting multiple operational models, including ERP-driven, labor-based, and legacy production workflows.
- Led the implementation of the Waiting For Work (WFW) workflow and support for palletized machines using event-driven orchestration.
- Delivered features including First Article Inspection, labor reporting, part counting, scheduling improvements, and ETTC calculations.
- Applied AI-assisted development workflows (Claude, Cursor, OpenCode) for spec-driven delivery, PRD-based feature design, parallel worktree development, subagent orchestration, and AI-powered PR review.
- Own technical design, domain modeling, API design, database migrations, production support, and incident investigation for assigned features.

Creed Interactive — Outsourced Software Engineer / Consultant

Nov 2022 – Apr 2024

- Maintained and upgraded a suite of Micro Frontend (MFE) applications built in Angular and React, improving platform stability and developer experience across a shared monorepo.
- Led the migration of a family of SSO systems to Keycloak, enabling centralized identity federation and streamlining authentication across multiple enterprise products.
- Architected and delivered a super-app navigation layer connecting multiple MFE products under a unified Keycloak-backed SSO, enabling seamless cross-app switching for end users.
- Built and maintained NestJS microservices and Docker-based infrastructure supporting the MFE platform, owning both frontend and backend layers end to end.
- Collaborated directly with product stakeholders across inventory, logistics, and operations domains, translating business requirements into TypeScript-first full-stack solutions.

Mariner — Front-End Software Engineer

Jul 2021 – Nov 2022

- Built Angular applications for industrial operations and shop-floor software.
- Collaborated on API contract design and data modeling with backend teams.
- Promoted Docker adoption across development teams through technical guidance.
- Maintained cloud-hosted applications and Azure integrations.

B2ML Sistemas — Full Stack Software Engineer / Technical Lead

Jan 2019 – Jul 2021

- Served as Technical Lead for a banking platform built on a microservices architecture.
- Led integrations with banking systems, payment platforms, and third-party services.
- Worked on security requirements, certification processes, and financial industry standards.
- Mentored junior developers and collaborated directly with customers and business stakeholders.

RZX Tecnologia — Full Stack Software Engineer

Jan 2016 – Dec 2018

- Progressed from intern to a key contributor on industrial software projects.
- Developed backend services, APIs, and web applications supporting real-time offshore operations.
- Contributed to distributed systems processing operational data and continued supporting the platform as an independent consultant.

SaskPower — Software Developer Intern

May 2015 – Aug 2015

- Built ISO-compliant mobile applications during a summer internship in Regina, Saskatchewan, Canada.
- Developed hybrid mobile apps using Apache Cordova, jQuery, JavaScript, and HTML/CSS for internal utility operations.

KEY ACHIEVEMENTS

Full-Stack Product Owner — Offshore Oil & Gas

Architected and delivered RZX Tecnologia's core platform from the ground up — sole owner of every feature, selected for offshore deployment in live oil & gas operations. Product survived acquisition, became Cognitiv, and continues operating today.

Fintech Technical Lead — Banking & Transit Payments

Led architecture and delivery of a microservices payment platform at B2ML connecting dozens of public-transit recharge providers, homologating a POS system from scratch, and meeting all banking security and compliance requirements under COVID-driven deadline pressure.

High-Stakes Outsourcing — IoT & Manufacturing at Scale

Delivered production features and resolved support escalations at MachineMetrics in a complex manufacturing domain — shipping MES capabilities on a high-volume IoT + ERP data platform with zero ramp-up time.

TECHNICAL SKILLS

CORE

React, Angular, TypeScript, Node.js, NestJS, Docker, Microservices

LANGUAGES

JavaScript, TypeScript, Java, Python, C#/.NET

FRONTEND

React, Angular, Redux, NgRx, Micro Frontends, HTML/CSS

BACKEND

Node.js, NestJS, Express, .NET Core, REST APIs, GraphQL, Hasura, Keycloak

DATABASES & MESSAGING

MySQL, PostgreSQL, Redis, RabbitMQ, NATS

TOOLS & INFRA

Docker, Git, Keycloak, REST APIs, GraphQL, Kubernetes (basic), AWS, Azure, GitHub Actions

ARCHITECTURE

Domain-Driven Design (DDD), Event-Driven Architecture, Microservices, Distributed Systems, Manufacturing Execution Systems (MES)

AI-ASSISTED DEVELOPMENT

Claude, Cursor, OpenCode, GitHub Copilot, Spec-Driven Development, PRD, Skills, Subagents, Worktrees, Parallel Development, AI PR Review

EDUCATION

MBA in Software Engineering with AI

Faculdade Full Cycle de Tecnologia (FCTECH), Brazil
2026 – present

Master's Candidate — Computer Science & Technology (incomplete)

Federal University of Itajubá (UNIFEI), Brazil
2019 – 2021

Bachelor of Information Systems

Federal University of Itajubá (UNIFEI), Brazil
2011 – 2016

Computer Science Exchange Program

University of Regina, Canada
2014

LANGUAGES

English — Fluent

Portuguese — Native
